Connection kit ELVB-ELPA1-25

Usage

- For ELP/PFA

ELVB-ELPA1-25 is a connection kit for heating cable ELP/PFA. The kit contains an M25 × 1.5 cable gland for connection to the junction box, and a green-yellow heat-shrink sleeve that insulates the earth braid connected to the protective earth. A black silicone heat-shrink sleeve ensures secure shrinking that seals and strain-relieves the transition between the inner insulation and the conductors. The conductors are fitted with end sleeves, and the earth braid is fitted with pre-tinned pin sleeves that are crimped using a crimping tool to ensure a secure connection in the junction box.
The kit gives you a sealed, insulated and correctly made connection that follows the manufacturer's installation instructions. The kit does not include an end seal, so this must be ordered separately.
