

Underfloor heating for caravans - on a roll

Ebeco Foil 48 V is a thin heating foil designed for underfloor heating in caravans. The foil is durable, reliable and thin - only 0.3 mm, which makes the construction height very low. Ebeco Foil is sold by the metre in various width, so that it can be perfectly tailored to fit. The foil is free of PVC.

The foil is joined together with cables and connection clamps with the aid of special pliers. Ebeco Foil is a 48 V foil controlled via a transformer.
