

Frost thawing mat

Ebeco thawing mat is used for quickly and simple thawing and performing warm work in many areas.

Developed to manage the toughest demands and environments; normally thaws up to 30 cm in 24 hours - or up to 60 cm in 24 hours on sandy ground. The reflective material on one side of the mat further improves efficiency. Since it is equipped with an earthed plug, it is also easy to connect and easy to move around.

Special solution for well drilling

This specially designed mat for well drilling has a hole in the centre for the feed pipe.

Examples of applications:

- Thawing of ground, sand, water pipes, waste pipes, feed in silos or silage balls.
- Heat maintenance in electrical and telecom cables, machinery and for bricklaying work.
- Well drilling.

TECHNICAL INFORMATION:

Material	PVC-covered nylon
Insulation	10 mm non-porous cellular plastic
Connection voltage	230 V
Output	c. 300 W/m ²
Connection cable	2.5 m
Supplied with	Overheating protection and earthed plug
Enclosure class	IP67
Approval	CE

ARTICLETABLE:

Item number	Output	Width	Length	Area	RSK number
8960501	2000 W	3.0 m	2.0 m	6.0 m ²	2438621
8960503	1000 W	1.0 m	3.0 m	3.0 m ²	2405003
8960507	1500 W	0.8 m	5.8 m	4.6 m ²	2405004
8960500*	330 W	1.0 m	1.0 m	1.0 m ²	2405005

*Heating mat with hole (Ø 195 mm)
