

Frostvakt Control

Using Frostvakt Control, you can protect from frost energy-efficiently and economically.

Frostvakt Control ensures that the heat is turned on only when the ambient temperature approaches freezing point. Best used with Frostvakt, but also excellent for regulating other frost protection and heating products.

TECHNICAL INFORMATION:

| | |
|---------------------------|-------------------------|
| Sensor cable | 3 m fitted sensor cable |
| Activation temperature | +3 °C |
| Connection voltage | 230 V |
| Enclosure class | IP 44 |
| Circuit-breaking capacity | 16 A |

ARTICLETABLE:

| Item number | Name |
|-------------|-------------------|
| 8580113 | Frostvakt Control |
